Mean Appraised Value

\$ 444,919

Mean Appraised Value in
Communities of Color

\$ 224,442

Mean Appraised Value in
White Neighborhoods

\$593,090

Appraisers determine a home's value by taking into consideration the property and neighborhood characteristics. To make an "apples to apples" comparison, we use a regression model that takes into consideration neighborhood housing stock (e.g., size, type, age), socioeconomic status (e.g., property owners, employment rates, poverty), and amenities (e.g., retail stores, entertainment, services, parks). The above estimates are the mean appraised values in the metropolitan area for neighborhood with average housing stock, socioeconomic, and amenities.
